DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to an antenna for use in inductive coupling two devices which includes two coils, a capacitor, classified in class 343, subclass 895.
 - II. Claims 7-14, drawn to a tire parameter sensing system for sensing a parameter of a tire of a vehicle which includes a vehicle base unit, a tire based unit, classified in class 152, subclass 152.2.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not required the inductors and the capacitor as claimed in claim 1. The subcombination has separate utility such as an antenna for use in inductive coupling devices.
